

# IKEEN Group 2008

# Company

IKEEN Software Development – is the reliable partner in the area of customized software development for companies aiming at quality and reliability of provided solutions.

# What we offer

Core service of our company is software development.

We develop systems of any complexity. Main priority is for the systems of medium and high complexity and scale.

Satisfaction guarantee for pilot projects.

# What we can do

- Correctly describe the task
- Analyze problem and find it's reason
- Clearly declare possible problem solutions
- Create solutions that take into account all pertaining details
- Implement our solutions to ensure best possible quality

# Methods

<b>IKEEN</b>	<b>STANDARD</b>
<b>Flexibility</b> Product is not limited by specifications	<b>Rigidity</b> Product is changed strictly in accordance with specifications
<b>Iterations</b> Product versions are supplied every two-three weeks	<b>Uncontrol</b> Product is supplied in significant time
<b>Development</b> Product improves constantly taking into account users' comments	<b>Stagnation</b> Product is developed as it is described in the specifications without users' comments
<b>Client focused</b> Client participates in developing the product by commenting	<b>Developer focused</b> Minimal participation of client in the process
<b>Simplicity</b> Less lines of code, less bugs, less user interface problems. Code is simple to use.	<b>Complexity</b> Complex structures, problems with identification of bugs, difficult to use
